

Discussion leader: Dan Deeth, Media & Industry Relations Manager, Sandvine

As Media and Industry Relations Manager at Sandvine, Dan Deeth is responsible for developing Sandvine’s image with media and industry analysts.

Dan also plays a major role in producing Sandvine’s industry-renowned Global Internet Phenomena program, which is Sandvine’s ongoing series of Internet phenomena and traffic analysis studies that have been published since 2002. Dan authors the program’s bi-annual reports and is also skilled at identifying current and future Internet traffic trends.

Prior to arriving at Sandvine in 2011, Dan held communications positions at Research In Motion, and also in the education and nuclear power industries. Dan holds an Honours Bachelor of Arts in Business Communications from Brock University and is certified Project Management Professional (PMP).

Call Topic: Exposing the Technical and Commercial Factors Underlying Internet Quality of Experience

For over 10 years, Sandvine’s Global Internet Phenomena Report has shined a light on fixed and mobile data networks around the world, identifying the facts, fads and future trends that drive the evolution of network

The 2H 2013 Global Internet Phenomena Report examines a representative cross-section of the world’s leading fixed and mobile data providers using real-life, subscriber-anonymous network data. In addition, we will discuss measurements and findings from a recently released Phenomena spotlight that examines the complex technical and commercial factors that impact Internet quality of experience.
