

## 802.11ac WiFi Speeds into Deployment

70% of all mobile devices in 2015 will run 802.11ac WiFi according to ABI Research. Among retail offerings 11ac WiFi has fast replaced 11n as the network of choice. App-addicted consumers are demanding the convenience of seamless wireless connectivity at home and are willing to pay a premium for it.

Join us for an exploratory journey of the 802.11ac technology - outlining its benefits, and opportunities for service providers. On our trip, we'll map wireless speeds to Internet access offerings, sight-see deployment scenarios, and keep a keen eye out for the competitive advantages available en route.

### David Thompson, Product Marketing Director, ZyXEL Communications, Inc.

David Thompson is Director of Product Marketing for ZyXEL Communications, Inc. Thompson is responsible for building partner relationships in the telecommunications industry and helping promote product lines and features that benefit both ZyXEL and its customers.

Prior to his current position, Thompson served as Director of Strategic Account Development and formerly as Senior Product Manager for ADSL CPE at ZyXEL.
